

## Manlift Ticket Tolleson

Manlift Ticket Tolleson - The Elevated Platforms and Manlifts Certification program helps to provide the needed training on the work practices, safe operating procedures, rules and regulations regarding the everyday activities for the operators of this machine. The program has been designed for individuals who are actively involved in these activities or individuals who have a basic understanding of this equipment.

manlifts and aerial platforms have become integral and common equipment in industrial settings during the last few decades. These machines provide an easy way to lift staff close to what has to be performed on a stable platform apparatus, allowing staff to carry out tasks with greater comfort and safety rather than being perched on top of scaffolding or ladders.

Like every other tool, manlifts are just safe if they are used properly. Because they lift staff above ground level or floor, accidents can easily take place and this might lead to serious death or injuries for both the manlift operators and any passerby who might be unlucky enough to be standing below.

There are different kinds of manlifts. Nearly all fall into 1 of 2 categories: the articulating boom lift, that has the capability of both vertical and horizontal movement and the scissors lift, which is capable of moving upward and downward.
