

Clark Forklift

At this time, there are over 350,000 Clark lift trucks performing worldwide, and upwards of 250,000 in service in North America alone. With five major lines across the globe, Clark is proud to be one of the most expansive organizations in the industry. Heavy duty trucks ranging from 1,500lb to 18,000lb capacities, dual fuel, gas, LPG, hand powered trucks, narrow-aisle stackers and electric riders are a few of their specialties.

Clark Totalift, handles more than 120,000 individual components designed for 20 distinctive brands of lift trucks and automated equipment. Your local Clark Dealer is your total source for availability of all your components needs supplied by Clark Totalift.

Clark has a extraordinary Parts Supply team. The parts warehouses are conveniently located in Changwon, South Korea and Louisville, Kentucky to guarantee exceptional service to both their customers and their sellers. For over 90 years, Clark has surpassed industry standards, being one of the most actively advancing producers. Driven to supply the highest level of value and service to our users, Clark remains on the leading edge when it comes to enhancing efficiency and benefiting performance.

Clark Totalift has a very impressive international support network. With over 550 locations worldwide, dealer representation in over 80 countries and 230 locations in North America, their high level of dedication to their clients predominates the material handling market.

By revolutionizing the operator restraint system safety feature, Clark proudly remains a leader of innovation in the industrial equipment and automated forklift industry. This exceptional dedication to safety is at this time a customary feature on every forklift.

Clark's relentless effort to boast the No. 1 Quality system in the industry is proudly demonstrated by ISO 9001. Clark, is the first forklift producer across the world to be certified with the globally accepted quality standard ISO 9001 for every one of their manufacturing plants. Also, the ISO 14001 Environmental Conservancy System certificate was awarded to Clark's Korean facility in 2001. This paramount achievement enables Clark to be ready for any number of environmental restrictions, thus placing them in a prevailing industry position.

Lean Production

Clark has chosen the system of "Lean Production" at all of its assembly facilities for the reason that this technique is particularly economical and enables minimal use of resources. Established to ensure maximum proficiency, this system is intended to discover and acknowledge the most effective ways for production facility stewardship. Clark has concluded this transition of its Korean plant. COPS which is Clark Optimized Production System, similarly focuses on quality of product and services and manufacturing efficiencies.

Engine Design

By working in concert, Clark's product suppliers and engineers communicate towards enhancing product efficiency while minimizing costs. The new value engineering agenda combines progressive product development and delivers improved consumer support and service within the industry.
